

Sample Student Page

This is how a student page should look like

* [Auger](#)

* [XPS](#)

* [XRF](#)

Here are some specs for each page:

- Each student should create his or her own wiki site.
- Each site should contain separate pages for the three topics
- Each page should have an **original** description of the technique including
 - The physics behind the technique
 - Original drawings (hand-drawings are acceptable)
 - One complete step-by-step description of the use of the technique from a publication including
 - Sample preparation
 - Procedure
 - Data (real or simulated)
 - Analysis
 - References
- The pages should be completed by
 - Auger - at the end of week 4
 - XPS - at the end of week 5
 - XRF - at the end of week 6
